INDUSTRY LEADING GOLD STANDARD FOR MOBILITY IN DEMANDING ENVIRONMENTS

MC9200 MOBILE COMPUTER

The MC9200 is the next generation in the industry-leading rugged MC9000 Series, now upgraded to support your next generation mobile applications. The rugged mobile computer that evolves to meet changing business needs brings you the same signature rugged design, best-in-class bar code scanning and dependable operation, now with the power to run applications with highly-intuitive interfaces that will further simplify processes and increase worker productivity in your toughest environments. And you get well-proven technology you and your workers can count on — every day, millions of users around the world count on their MC9000 Series mobile computer to better manage inventory in warehouses and manufacturing plants, track baggage on airport tarmacs in any kind of weather and keep weaponry and vehicles on military bases in peak operating condition. The MC9200 — the next evolution in the world’s leading mobile computer for demanding environments.

The power you need to support any application
A dual core 1 GHz processor, 2GB of Flash memory, up to 32GB of additional SD memory and Microsoft’s advanced mobile operating systems provide the power to run complex ERP applications — simultaneously.

High-speed 802.11a/b/g/n Wi-Fi
Support for the fastest Wi-Fi connection available today — 802.11n — provides your workers with the best possible wireless voice and data experience.

Proven rugged construction, ready for your most challenging environments
Every day, MC9000 Series devices deliver reliable performance, despite everyday drops on concrete, subzero cold, extreme heat, dust and exposure to splashing liquids.

Easy-to-read display in any lighting condition
The 3.7 inch high-resolution backlit color VGA touchscreen display provides excellent readability — even in bright sunlight.

Government-grade security
Government-grade FIPS 140-2 Level 1 certification secures Wi-Fi and Bluetooth wireless communications, without impacting device or application performance.

Six advanced scan engines — the most scan engine options
No matter what type of bar codes are in use in your facility, there is a scan engine option that is optimized for rapid-fire capture of 1D, 2D, driver’s license, DPM codes and more — even if the codes are dirty, damaged or poorly printed.

Six interchangeable keypads for superior customization
Choose the keypad that makes data entry as easy as possible for any type of application. No need to send the device to a service depot, you can change the keypad in minutes, right on site.

Compatible with your existing MC9000 Series accessories
Since the MC9000 Series accessories you already own will work with the MC9200, you can cost-effectively upgrade your mobile computers to provide support for today’s more processing intensive, elegant and intuitive applications.

A device with the intelligence to sense and act on motion
Integrated sensors enable the MC9200 to recognize and automatically power down when the device is not in use, as well as record device drops for man-down and other applications.

TAKE EFFICIENCY AND ACCURACY TO THE NEXT LEVEL IN YOUR MOST DEMANDING ENVIRONMENTS WITH THE RUGGED MC9200

### PERFORMANCE CHARACTERISTICS

**CPU**
- Dual core 1GHz OMAP 4 processor

**Operating System**
- Microsoft Windows Embedded Compact 7.0
- Microsoft Windows Embedded Handheld 6.5.3

**Memory**
- 512MB/2GB, 1GB/2GB (Premium models only)

**Expansion**
- User accessible 32GB SDHC card slot

**App Development**
- PSDK and EMDK available through Motorola Support Central Web site

### USER ENVIRONMENT

**Operating Temp.**
- -4° to 122° F/-20° to 50° C

**Charging Temp.**
- 32° to 104° F/0° to 40° C

**Storage Temp.**
- -40°F to 158°F (-40°C to 70°C)

**Humidity**
- 5% to 95% non condensing (Condensation Resistant Configurations Available)

**Drop Specification**
- Multiple drops to concrete: 6 ft./1.8 m across the operating temperature range; meets and exceeds MIL-STD 810G

**Tumble Specification**
- 2,000 3.28 ft./1 m tumbles at room temperature

**Scanner Exit Window**
- Corning Gorilla™ glass

**Sealing**
- IP64 (electronic enclosure, display and keypad) per IEC Sealing specification

**Electrostatic Discharge (ESD)**
- ±15kVdc air discharge; ±8kVdc direct discharge; ±4kVdc indirect discharge
